What will we talk about?

- How can Student Learning Outcome (SLO) assessment help improve courses and programs?
- How can I access and interpret SLO data to complete course/program reports?
- What should SLOs look like for effective assessment?

Having a discipline representative attend ensures each department will be up-to-date on their SLO course and program reports!

All departments will be provided with their assessment schedules ahead of time. These same templates will also be available the day of the event.
